4.4. EUT Configuration on Test

The following equipments are installed on conducted emission test to meet EN55015 requirement and operating in a manner, which tends to maximize its emission characteristics in a normal application.

4.4.1. Solar power light (EUT)

Model Number : **cssty-230**

Manufacturer : **IYSERT ENERGY RESEARCH PRIVATE LIMITED**

4.5. Operating Condition of EUT

- 4.5.1. Setup the EUT and simulators as shown in Section 4.1.
- 4.5.2. Turn on the power of all equipments.
- 4.5.3. Let the EUT work in test modes (EUT WORKING) and test it.

4.6. Test Procedure

The EUT is put on the table which is 0.8 meter high above the ground and connected to the AC mains through a Line Impedance Stabilization Network (L.I.S.N.). This provided a 50ohm coupling impedance for the tested equipments. Both sides of AC line are checked to find out the maximum conducted emission according to the **EN55015** regulations during conducted emission test. And the voltage probe had been used for the load terminals test according to the **EN55015** standard.

The bandwidth of the test receiver (R&S Test Receiver ESHS30) is set at 10KHz. In 150KHz~30MHz and 200Hz bandwidth in 9KHz~150KHz.

The frequency range from 9KHz to 30MHz is checked.

- 5.5.3. Let the EUT work in test mode (ON) and test it.

5.6. Test Procedure

The EUT is placed on a wood table in the center of a loop antenna. The induced current in the loop antenna is measured by means of a current probe and the test receiver. Three field components is checked by means of a coax switch.

The frequency range from 9KHz to 30MHz is investigated. The receiver is measured with the quasi-peak detector. For frequency band 9KHz to 150KHz, the bandwidth of the field strength meter (R&S Test Receiver ESHS30) is set at 200Hz. For frequency band 150KHz to 30MHz , the bandwidth is set at 10KHz.

All the test results are listed in Section 5.7.

5.7. Test Results

PASSED

The frequency range from 9KHz to 30MHz is investigated.

As the peak value is too low against the limit, so the Quasi-peak value has been omitted.
